

ABSTRACT OF THE DISCLOSURE

An electric heating fumigator (100) includes a base (9), a case cover (12) and a heater support (3) mounted on the base (9). A heater (1) is inserted into the heater support (3) and heat-insulation layers (2, 5) are attached to the heater support (3), so that one of them is located between the heater (1) and the heater support (3). The bottom of the support (3) is fixed on the base (9) of the fumigator. The electric heating fumigator provides better heat-insulation and electrical insulation effects, such that it can increase to a higher temperature to heat and discharge a large amount of medicament in a short time in a safe and stable way.
